

Electronic Health Records

Choosing an Electronic Health Records (EHR) system doesn't have to be a difficult task. Benchmark EHR delivers the advanced functionality and flexibility you need along with superior support services to ensure your success.

As a fully integrated EHR, Scheduling, Practice Management and Patient Portal solution, Benchmark Systems provides all the tools you need to increase revenue while improving patient care and productivity. See more patients, easily document interactions, and access medical records, diagnostic data, and more at the point of care.

Expedite and track orders with Benchmark Systems CPOE module by connecting to any lab, radiology, practice management, or pharmacy system using our HL7 interface. Ensure compliance and continuity of care as we maintain and continually update all major files, including ICD-10, CPT, drug and formulary data, and national pharmacy lists. There's also the option to load Medicare and other payer fee tables and track necessary measures required by MACRA/MIPS reporting.

Best of all, Benchmark EHR does all of this without turning your practice inside out. Access information anytime, anywhere with our browser-based solution so there's no expensive hardware or software to install, update, or maintain. This intuitive system is easy to use and unlike most EHRs, is easily customizable. With our flexible architecture templates and other content can be built and modified dynamically meeting your individual needs. When it comes to helping you achieve success Benchmark EHR doesn't stop at technology; We provide end-to-end implementation services and a variety of support and training options ensuring your entire staff has the knowledge and confidence to utilize your new EHR system.

Why Rely on Benchmark EHR?

Convenient

As a web-based system, retrieve patient information anywhere, anytime and access all of your charts. Compatibility with point and click, touchscreen, and optional voice recognition makes data entry easy for everyone on your staff. Benchmark EHR works with PCs, tablets, and hand-held devices to document patient encounters at the point of care.

Accurate

Avoid inadvertent under-coding as the system automatically recommends the correct E&M codes then sends ICD-10 and CPT codes directly to your billing system. Used with Benchmark Practice Management our Clinical Billing Module averages a 98 percent first-pass claims acceptance. The system easily captures information for current MACRA/MIPS reporting. Get direct access to the national drug database to track abuse and interactions. Health maintenance guidelines are at your fingertips, reducing medical errors and improving patient care.

Flexible

Unlike most EHRs, Benchmark Systems adjusts to meet your practice needs and personal preferences. Choose from templates or free flowing data entry designed and used by doctors in 40+ board certified specialties and subspecialties or modify our fully- customizable styles and even build templates dynamically.

Reliable

Benchmark Systems maintains and continually updates all major files and key data so you can be assured that the information you rely on is always accurate and up to date. Use the internal messaging system to keep everyone in the office on the same page; send patient information alerts, accelerate care, and information exchange by tracking and sending records to labs, pharmacies, and referring doctors. Collaboration is easy as Benchmark EHR is compatible with many other healthcare systems.

Patient and practice data are hosted in a SOC level 1, 2, and 3 compliant facility in the U.S. where confidentiality, integrity, and availability of all systems is top priority. Benchmark EHR complies with the latest certifications, HIPPA, and other critical industry standards to protect your patients and your practice.

Secure

A Legacy Of Success

Leveraging over 40 years of expertise Benchmark Systems helps healthcare providers lower costs and solve practice management issues. As a certified EHR vendor we have the experience and expertise to help you significantly lower expenses. Our flexible advanced technology and superior customer service is the difference. Visit www.BenchmarkSystems.com to learn more or contact us to join the thousands of physicians in over 40 specialties who use Benchmark Systems integrated solutions suite, including Benchmark EHR, every day.

“

“Remote access to my patients’ records improves patient care and makes me more efficient.”

Craig Petry, MD
Wyndhurst Family Medicine

”

“

“From the very beginning of our search for a new system/ software, we were impressed with Benchmark Systems. The system is user friendly. Our experience overall has been a pleasant one.”

Alan B, Birnkrant, M.D.
IMERSHEIN & BIRNKRANT, PC

”

Patient Portal allows you to:

- Complete new patient intake forms
- Request or check appointments
- Check lab results
- Order prescription refills
- Message the clinic directly
